Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 5 rejected under 35 U.S.C. 102(b) as being anticipated by
Noguchi et al (US 5,497,293).

Regarding claims 1 and 5, Noguchi et al ('293) disclose a surface illuminant device having a semi-transparent panel 1, and electric power system (not shown) but inherent feature to provide energy to a light source 7, to illuminates a portion of the panel 1 (figure 1) and a first and second clamping arm 6a, 6b.

Regarding claim 3, the clamping arms are of an equal length as shown in figure 1.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Noguchi et al ('293).

Regarding claim 2, Noguchi et al discloses all the limitations of the claimed invention as cited in claim 1 above, but does not disclose the clamping arms 6a, 6b being of different lengths, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide to have the clamping arms at different lengths, since it has been held that the provision of adjustability, where needed, involves only routine skill in the art. *In re Stevens, 101 USPQ 284 (CCPA 1954)*.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Thompson (US 4,918,578) shows a light piping display..

Response to Arguments

Applicant's arguments with respect to claims 1-3 and 5 have been considered but are moot in view of the new ground(s) of rejection.
